FULL STACK DEVELOPER

I am Full-stack developer in MERN stack and a strong focus on Backend Development. I have built projects like a URL shorten-er(analytics , Qr Code etc.) , e-commerce backend , blog , VS Code theme extension etc. While i can work on both fronted and backend , my expertise lies in creating APIs and managing server side logic . I am eager to learn and contribute in projects.

KEY SKILLS

JAVASCRIPT   REACT   GIT & GITHUB   NODE JS   EXPRESS   MONGODB

SQL   COMMAND LINE INTERFACE   RDBMS   DATA-STRUCTURE & ALGORITHM

INTERNSHIP

EDUREKA   **AUG 2022 - DEC-2022**
FULL STACK DEVELOPER (MERN)

I completed an Edureka internship where I built a Zomato clone using the MERN stack and integrated Razorpay for payments. The project included user authentication, restaurant listings, search, and food ordering. This project enhanced my skills in full-stack development and payment gateway integration.

PROJECTS

URL shortner

Created ShortenX, a simple URL shortener with features like custom links and tracking. Built using React and Node.js, with MongoDB for storing data. It allows users to easily generate and manage short URLs.

Ecommerce-backend

This e-commerce backend is built with Node.js, Express.js, and MongoDB. It provides an API to manage users, products, orders, and payments. Features include login and user roles (customers and admins), order tracking, cart management. It uses caching and optimizations for better performance.
